

ALU CLEAN PRO

If your anilox has aluminum parts, Alu Clean Pro is the ideal product for effective cleaning.

Specifically designed for cleaning all types of ink on aniloxes with aluminum components, Alu Clean Pro, like the W200, is perfect for daily and deep cleaning and is best used in a machine.

- When using an Anilox Spray Cleaner (ASC) machine, we recommend using Alu Clean Pro pure.
 - For the ultrasound machines (NextWave), we suggest diluting it up to (1:1).
- ⇒ After the cleaning cycle is complete, rinse the anilox thoroughly with clear water before reusing it into the printing process.

Technical specifications:

Usage:	Cleaning product
Type of ink:	Any types of ink
Target:	For daily cleaning of ceramic or chromium rolls, and spare parts, ... Ideal product when Aluminum is present
Aspect:	Colorless liquid
Packaging:	20 liters jerrican
Shelf life:	24 months
How to use:	Product ready for use for manual cleaning Product ready for use for ASC machines Product ready for use. Dilution possible up to (1:1) for NextWave machines Ideal use temperature at 35°C

Always consult Recyl TDS (Technical Data Sheet), product label, MSDS (Material Safety Data Sheet - upon request) for proper usage instructions and appropriate safety.

ALU CLEAN PRO

Cleaning in washing machine (ASC or NextWave type)

- Refer to the operating instructions of the machine
- Fill up the tank
- According to the machine and your needs:
 - use the product pure in chemical spraying machines (ASC type)
 - dilute the product up to (1:1) in ultrasonic machines (NextWave type)
- Rinse with clear water. Change the rinse water frequently
- Wash out the saturated liquid with other cleaning effluents
